## NEW WSD TEMPERING OVEN

---

July 2, 2015,

Wisconsin Shower Door is excited to announce our investment in a new TK Tempering Oven. We are also pleased to announce that we have successfully passed our Guardian ShowerGuard tempering certification and have also received our Safety Glazing Certification Council (SGCC) bond numbers. We are in the final stages of process testing and certification and are eager to offer in-house tempering in the near future.

One of our primary tempering vendors has unexpectedly severed our business relationship effective immediately. As a result of this change, we are actively increasing our in-house production to maintain current lead times and minimize delays. At this time WSD will not be accepting customers' glass for tempering. Please note future order acknowledgments for updated lead times.

Thank you for your patience as we complete the final stages of testing and certification. We look forward to meeting your tempering needs in near future.

Sincerely,

Chuck Biesik // President
