- Always easier to clean and keep clean
- Stays cleaner for longer
- Does not support the growth of bacteria
- Eliminates the need for harsh and abrasive cleaning products
- Backed by a 10 year warranty

The ClearShield™ System

General Maintenance

For best results and to maximize the performance of your shower glass protected with ClearShield, it is recommended to squeegee dry after each use.

As needed, clean shower glass with a soft cloth or sponge with a cleaner. An effective and inexpensive glass cleaner that will not harm glass protected with ClearShield is a simple mixture of 80% water and 20% vinegar. Place mixture in a spray bottle, apply to glass and wipe clean with a microfiber cloth or sponge.

Glass Cleaners like Windex and Glass Plus, will not harm glass protected with ClearShield, although they are unnecessarily strong. Never use commercial strength cleaners or products such as Lime Away or CLR on ClearShield Glass.

DO NOT USE any abrasive scouring powders or pads, highly acidic / alkaline cleaners or sharp instruments (razor blades or hard instruments) to clean your glass protected with ClearShield. These can permanently damage the glass.

ClearShield also keeps your glass hygienically clean by reducing bacteria growth!

ORDINARY GLASS
